## **Dogs of Puzzled Pint!**

The first word of each line of the flavor text is your instruction to get USING FIFTH WORD AND INDEXING BY RATINGS. Take the fifth word from each description paragraph (not the dogs name and location), then take nth letter of that word based on the number of dogs that are filled in. This gets you the answer:

#### THE RATINGS BY TAIL WAG

I'm a proper Puzzled Pint pup who loves solving puzzles for food.

We are rescues and have become great thinkers.

#### -Iuno from Missoula.

I think that armrests should not go to waste. They make great headrests.

I have found that being under the desk is the secret to getting frequent petting.

#### 1. Pog Bones

The neighbor dogs, Festus the Mastiff and his friend Klondike the Alaskan Husky, have been spending a lot of their time burying bones in the park. See if you can "dig up" the locations of all the bones in this grid, then *feel* around for something else that Betty the Maltese wishes Festus and Klondike would learn to do instead.

Each number represents the number of bones that can be found adjacent to it. (including diagonally). No bones will be found in cells containing a number.

## 2. Pog Walk

RRRAR

Claude went for a walk and visited a bunch of his dog friends along the way. He made a mental note of each dog's name, in order. If you figure out where he found each dog, you will also discover a sort of behavior that is frowned upon during a walk through the neighborhood.

This puzzle is a combination of a Battleship and Masyu puzzle. The rules are as follows:

1. Each dog must be placed in the grid horizontally or vertically. Each number indicates how many dog squares are in the corresponding row or column (like a Battleship puzzle).

2. The dogs must be placed so no dog touches any other dog, not even diagonally.

3. Black dog squares and white dog squares must not be in the same column.

4. Once the dog locations are known, they must be joined in a continuous path loop (like a Masyu puzzle), starting and ending at home in the top-left.

5. The path must go through every dog and through all squares the dog occupies. The path may not turn within a dog.

6. The path must turn one square before a white dog, one square after a white dog, or both.

7. The path must not turn in the one square before or after a black dog: it must go straight through both of those squares.

8. The path must not cross itself. The path will not go through all of the squares.

9. The fire hydrant is a blocked square for everything. No dog or path part may be in the square with the hydrant.

### 3. Dog Smarts

Nikki the Finnish Spitz is so smart, she can create crossword puzzles! She sent this one to her neighbors today to explain why she can't come out to play.

Part of the body Creative work Pulse of music Prejudice Period of time Anger Alike French for "head"

Consume food French for "water" Where scientists may work Many Puzzled Pint locations Take money for Type of ladder Chinese "way"

Relating to life (prefix) Type of sword Tell a tall tale Reed instrument Type of fuel Nocturnal birds Bottom of a shoe Unfinished (abbr.)

Teeth on a gear Wind in circles Wildebeest Quaint hotel Noisy Single unit Lennon's wife Mail

# **Answer: RAIN**

4. Dog Toys

Claude won't share his favorite toy with Buddy the Pointer or Tumble the Newfoundland, but the toy is the key to this puzzle! In each row and column find one breed of dog (some of which you will have seen in previous puzzles). Once you've done that, you should be able to determine what pastime Claude loves best.
